Fabricamos tus sueños | Producing your dreams

→ WE FOCUS ON QUALITY

In line with the evolution of regulations and as an integral part of our philosophy, at Pavistamp we strive to reduce the environmental impact of each of our products and continuously improve their performance. Our product lines are subjected to rigorous development and review processes.

→ COMMITMENT TO CERTIFIED QUALITY

Guaranteeing the quality of our products through strict controls and certifications granted by renowned independent laboratories is our mission. Pavistamp has built a solid reputation worldwide thanks to the constant quality of its products, manufactured and evaluated under rigorous regulations.

Our products meet the most demanding regulations in various aspects, ensuring that our products are at the forefront of quality and performance.

→ A GLOBAL APPROACH

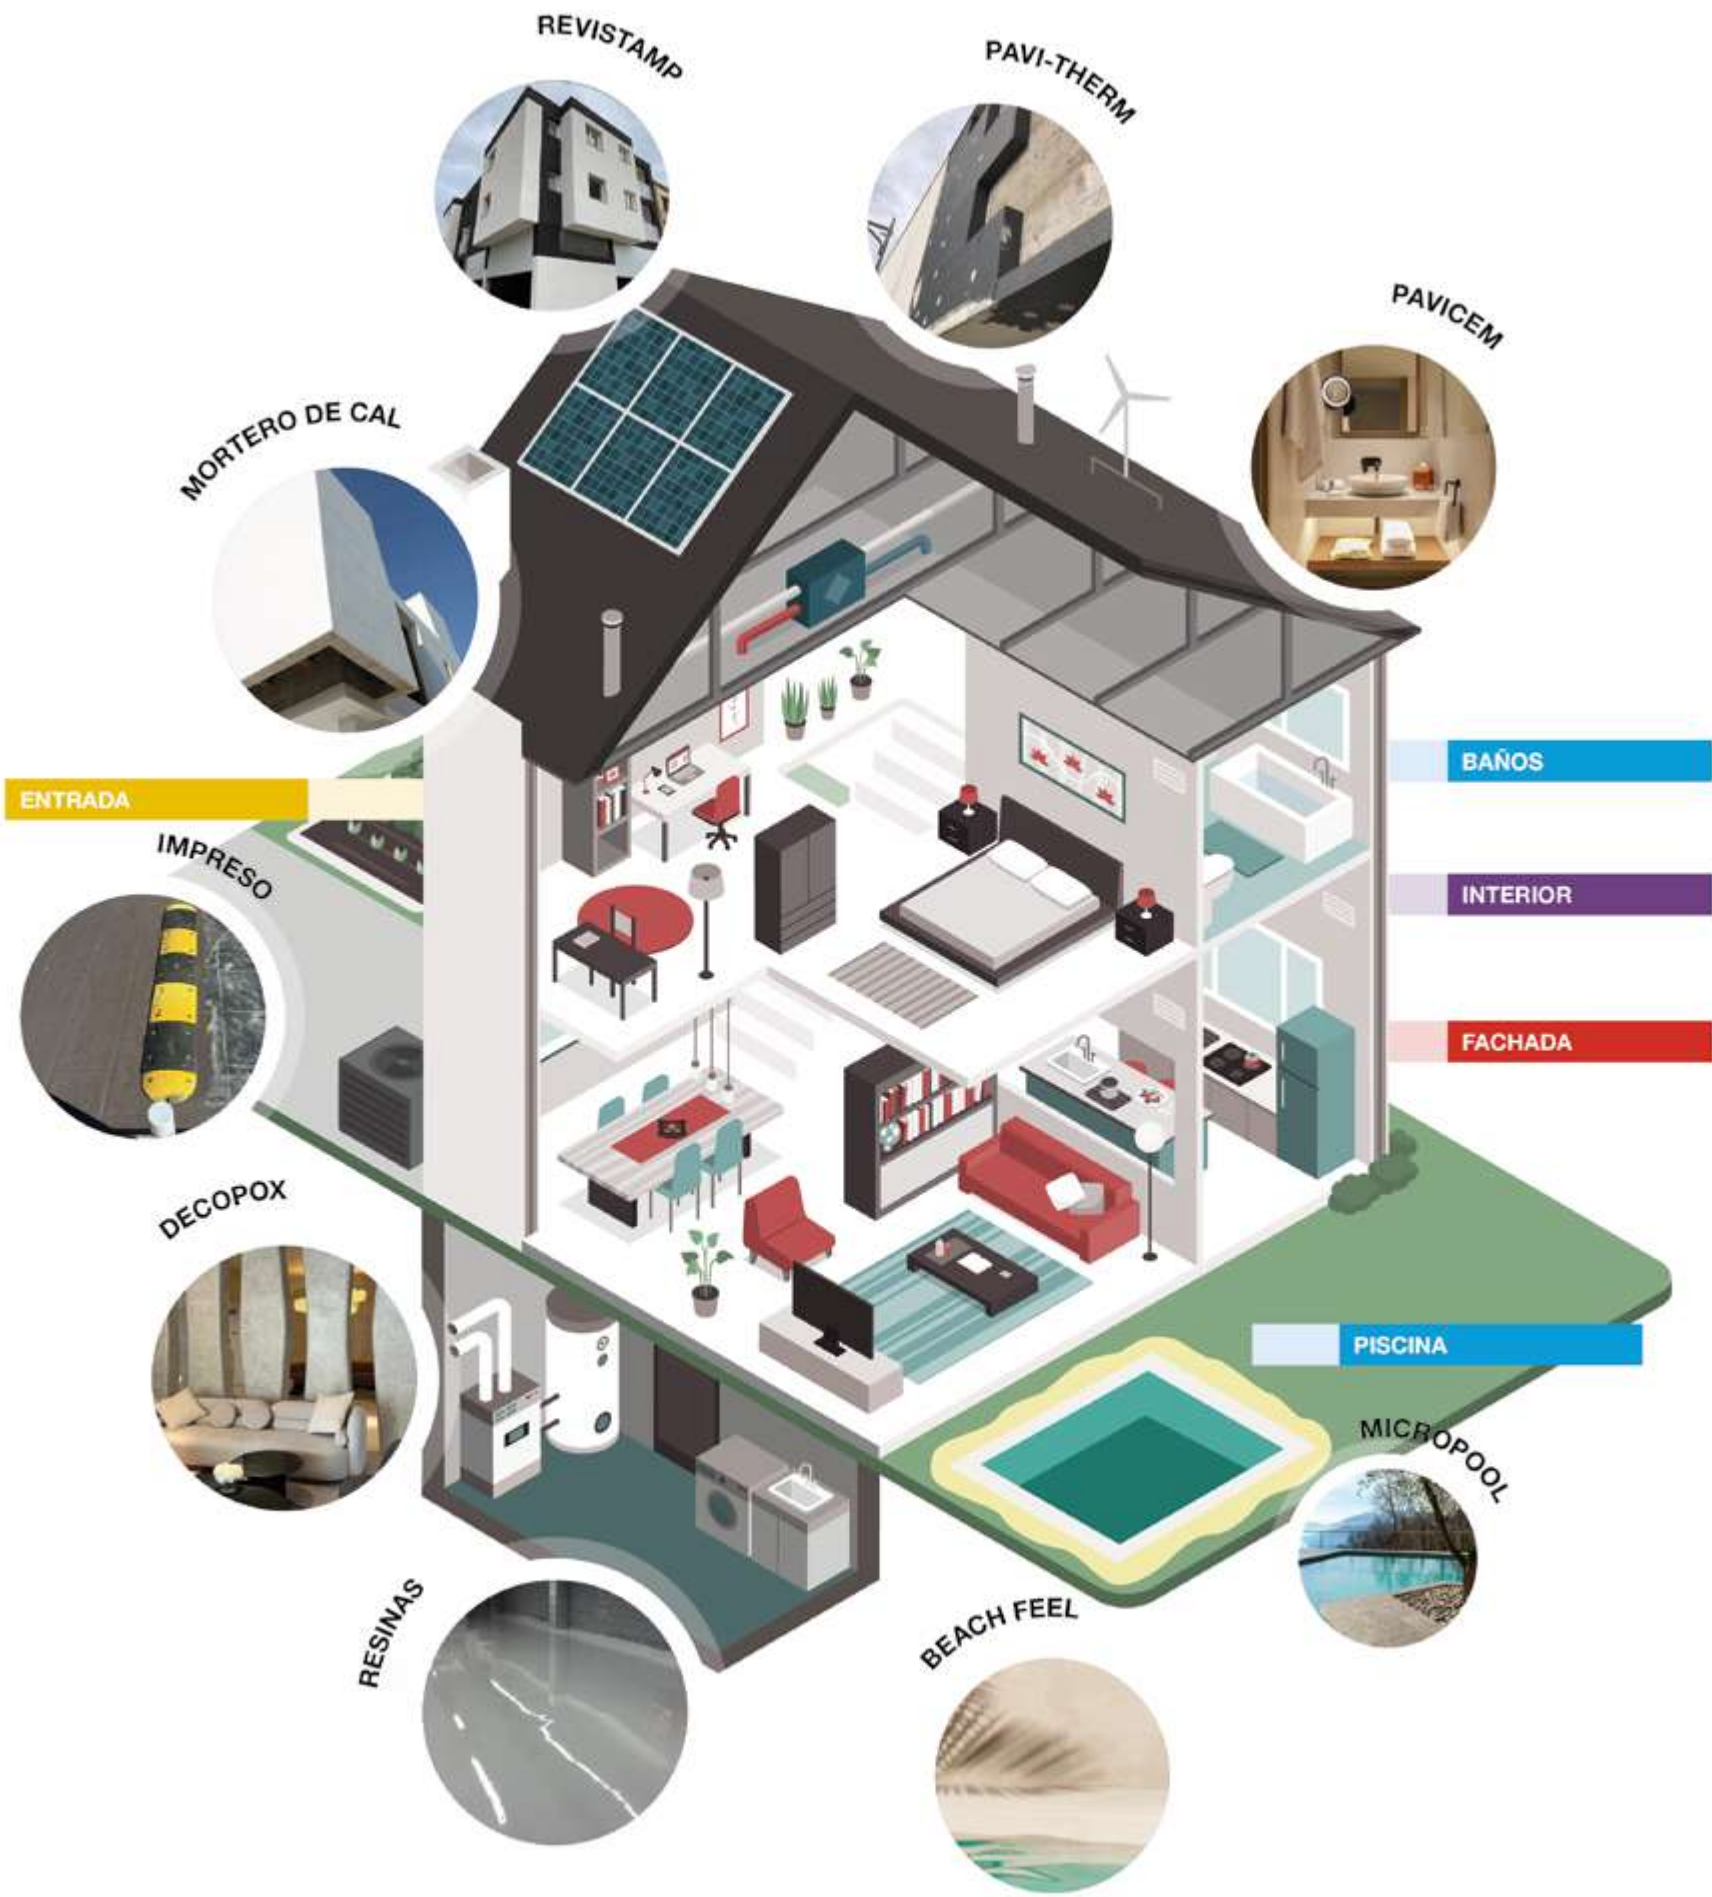

Today we are a dynamic and adaptable company that distributes its products globally. Our main priority is customer satisfaction, and we always follow a policy of constant quality.

→ CERTIFICACIONES DE CALIDAD

Pavistamp operates under a management system certified in accordance with the UNE-EN ISO 9001:2008 standard, audited and certified by **LGA TECHNOLOGICAL CENTER APPLUS**. This applies to our design and production activities of floor and façade cladding systems, as well as to our training programs delivered by specialized technicians.

→ EXPERIENCE AROUND THE WORLD

With over 30 years of experience, our company prides itself on manufacturing high quality products that have been exported to over 40 countries worldwide. Our long track record in the international market is a testament to our commitment to excellence and customer satisfaction globally.

RIGOROUS QUALITY CONTROL

Quality and environmental policy

Pavistamp has a management system in accordance with the UNE-EN ISO 9001:2015 standard, audited and certified by LGA Technological Center APPLUS, for the design and production of products, flooring and façade cladding systems, as well as the marketing of tools for their application.

Pavistamp and the value of staying up to date with the main trends and challenges of the sector.

As members of the Spanish Association of Continuous Paving (AEPC), at Pavistamp we demonstrate our commitment to the industry. This collaboration allows us to exchange knowledge and experiences, helping to establish the highest standards in construction products. We believe in joint growth and in promoting innovative practices for the development of the sector.

Microguard: Advanced Antimicrobial Protection for Continuous Flooring

Microguard is a chemical additive for continuous flooring that offers advanced antimicrobial protection, ideal for environments with high hygiene demands. Its formulation creates a protective layer that fights microorganisms, prolonging the durability of surfaces in hospitals, schools and commercial premises. Compatible with various types of flooring, it offers a versatile, high-performance solution.

VOC-Free Products: A Revolution in Sustainable Construction

Eliminating VOCs (Volatile Organic Compounds) in building materials represents a major step towards sustainability. These products, which reduce polluting emissions, are essential to improving air quality and health in living spaces. By opting for VOC-free materials, you not only protect occupants, but you also promote responsible building practices, aligned with strict environmental regulations.

HR-DRY by Pavistamp: The Essential Technology for the Long-Lasting Waterproofing of Buildings

HR-DRY technology is a key innovation in construction, designed to waterproof materials, creating a barrier that prevents water penetration and structural damage. This system protects against leaks and prolongs the life of buildings, reducing maintenance costs. With HR-DRY, materials become weather resistant, offering an advanced waterproofing solution for long-lasting structures.

PAVISTAMP Recognition in the 2023 Work Award

The Spanish Association of Continuous Pavements (AEPC) awarded PAVISTAMP the 2023 Work Award for its project at the Mondrian Hotel in Ibiza. This recognition, received at the Eduardo Torroja Institute in Madrid, highlights our excellence in continuous pavements. The AEPC promotes the highest levels of quality and safety in the sector, backed by leading companies that contribute to the improvement of the industry.

## PAVISTAMP

For the renovation and decoration of floors

System applied to fresh concrete and allowing it to be printed to obtain a tread layer of excellent hardness and durability. This range of high-resistance products offers different types of finishes such as stamped, smooth, striped or trowelled to give it a unique appearance. It is made with colour additives and moulds to achieve the impression of the desired model or mould.

Printed pavement is used to decorate pavements with cobblestone or wood type moulds and for surfaces that are exposed to moderate traffic such as garages, car parks, streets or terraces, with great durability to inclement weather. There are 20 colours available and a set of complementary products to achieve an aesthetic and functional finish.

## PAVIFLUID

Fluid mortar for floor renovation and decoration

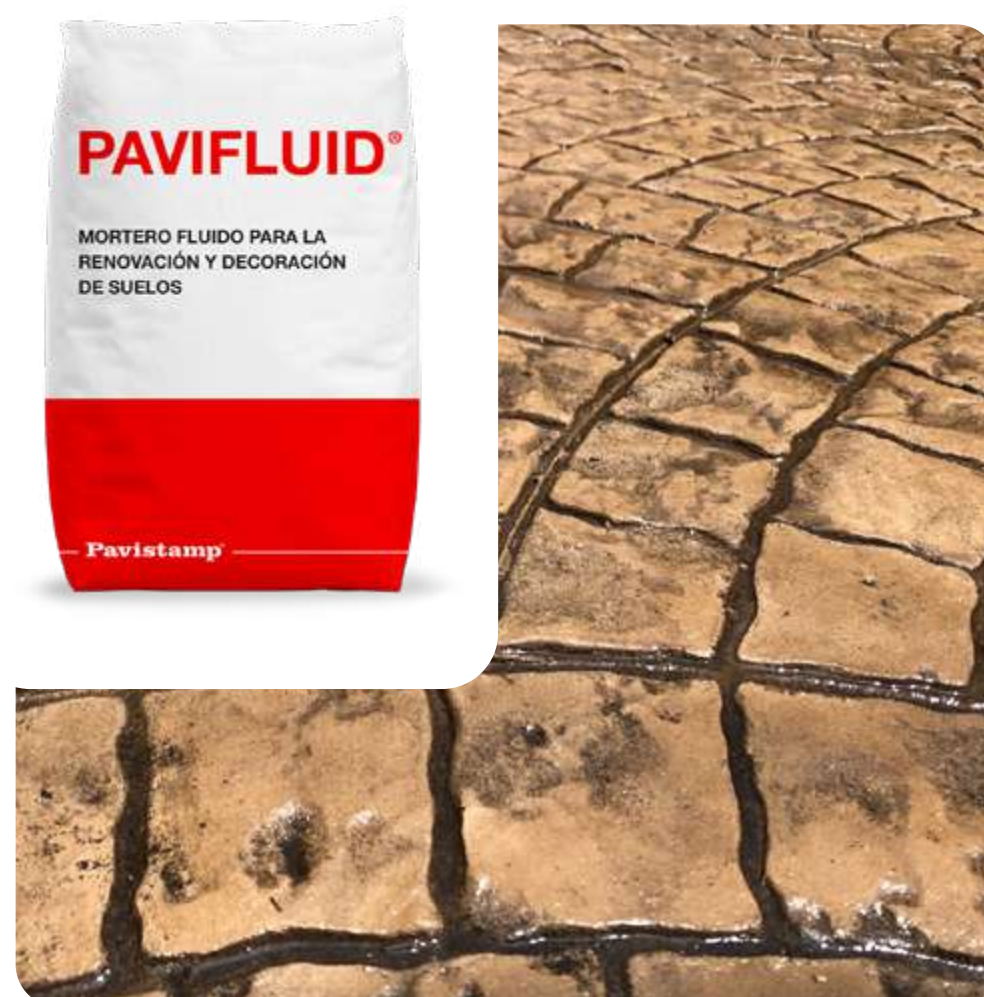

Pavifluid is a fluid mortar specifically designed to renovate and decorate floors.

Its composition based on white cement, quartz, selected aggregates, fibers, additives and pigments gives it unique properties that make it ideal for a wide variety of applications.

Its durability stands out, thanks to its composition, it offers excellent resistance to wear and tear, pedestrian and wheeled traffic.

## AREAS

Parking / Solarium / Common Areas / Swimming Pools / Sports Areas / Children's Parks / Theming / Bar / Restaurant / Outdoor Furniture

## DECOSOL

Cement paint for renovating pavements or porous surfaces

Complete breathable cement paint system to rehabilitate any type of pavement or porous surface. Decosol is an industrial and decorative water-based pavement that can also be applied near the sea and for ice and thawing with salts. We have a range of 56 original colours with the possibility of manufacturing special colours to repair and decorate at the same time.

It can be applied very easily by individuals, companies specialised in the sector, municipal brigades or professionals on busy industrial surfaces, private properties, swimming pools, housing estates or cities. Its resistance to ageing ensures long durability.

## CONTINUOUS PAVEMENTS

## STONE FEEL

Mortar for pavements

Stone Feel is a flooring mortar from the Green Line Eco line that uses recycled glass and 100% recycled aggregate concrete to create sustainable floors.

It stands out for its focus on restoring minerals, reducing CO2 emissions, minimizing harmful chemicals, improving indoor air quality, and recycling materials to extend their useful life.

It is ideal for offices, shops, homes, and other buildings, as it combines strength, durability, and style. Pavistamp offers a wide range of colors in this ecological flooring that helps create healthier environments with less environmental impact.

# OUTDOOR FURNITURE

## FURNITURE

Furniture covering

Pavistamp's continuous coverings are an ideal option due to their resistance, durability and seamless design, which provides elegance and visual cleanliness.

These materials allow for customised finishes in different textures and colours, adapting to the aesthetics of the space. Being easy to clean and maintain, they are perfect for floors, countertops, tables, bars and wall coverings.

In addition, this type of material, due to its composition, guarantees high resistance to wear, ideal for traffic and daily use in hotel environments.

## OUTDOOR FLOORING

## DRAINAGE SYSTEMS

## PAVIDUR

Resin and cement adhesive for bonding stones

The Pavidur system is a high-viscosity, single-component adhesive designed for bonding stones. Free of solvents and fillers, it provides a strong and secure bond in construction and decoration projects.

This adhesive is classified as fire-resistant in category Bfl s1, making it ideal for applications requiring increased fire safety.

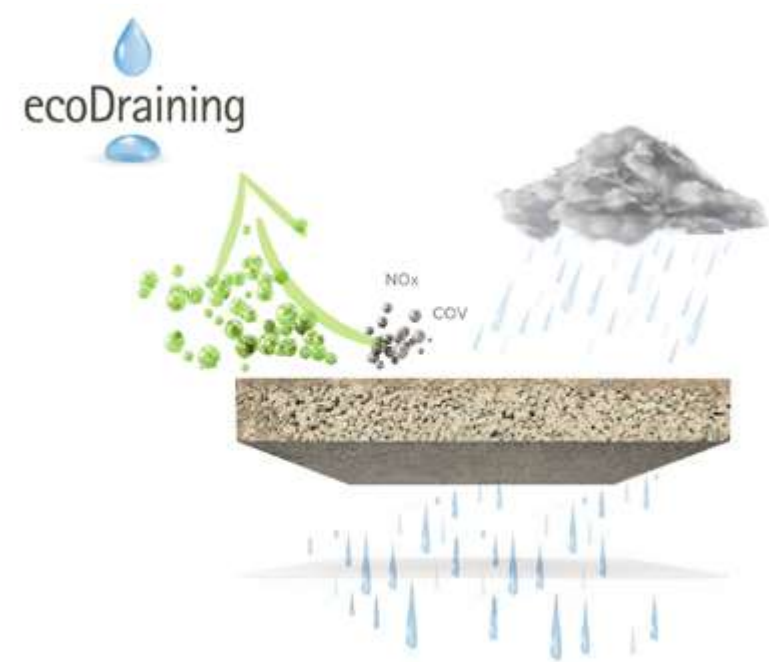

The Pavidur Cementitious system is a powder-based surface fixative and mass binder for bonding crushed aggregates.

Its formula ensures precise and reliable application on stone surfaces.

## DRAINAGE PAVEMENT

Permeable soil that allows rainwater to filter through, preventing puddles and promoting efficient natural drainage.

## AREAS

Parking / Solarium / Common Areas / Swimming Pools / Sports Areas / Children's Parks / Theming / Bar / Restaurant

## EXTERIORS

## OUTDOOR SYSTEMS

## PAVIPARK AND SPORTS COURTS

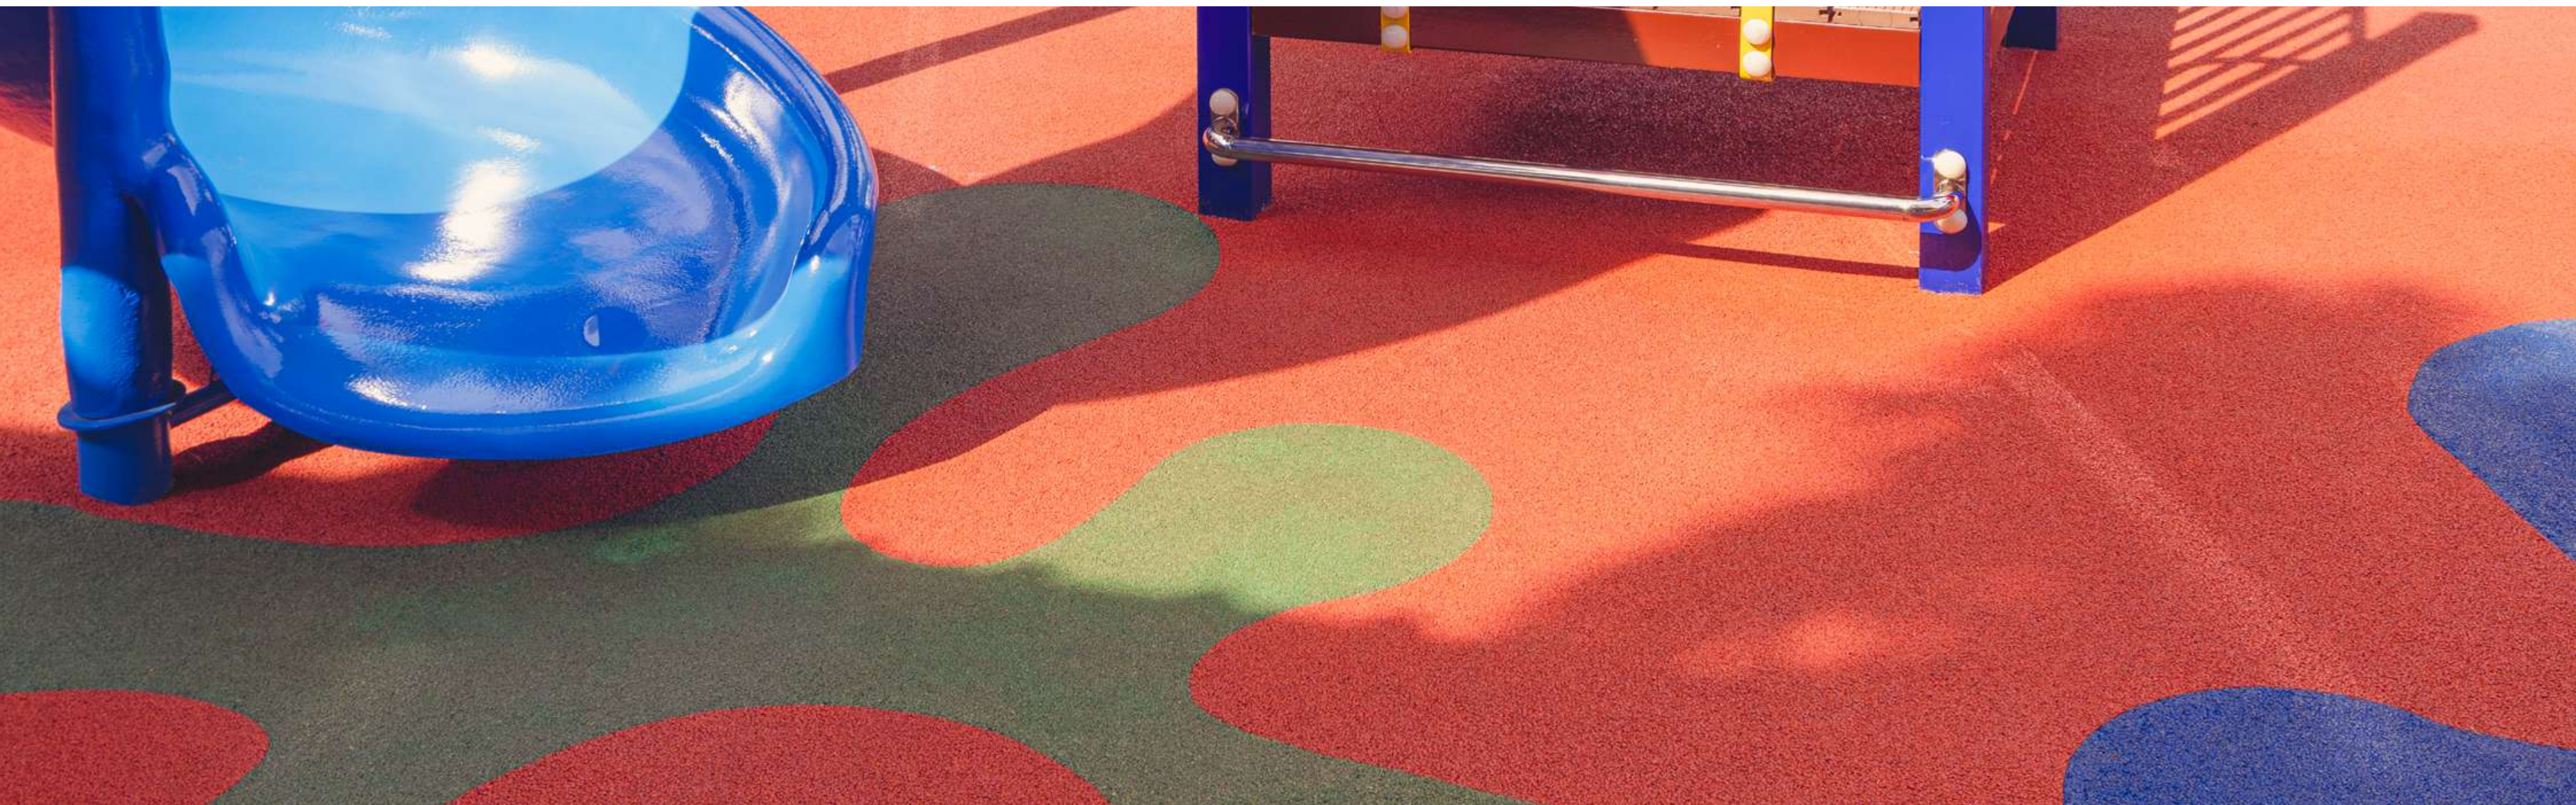

Continuous rubber flooring

Pavi Park is a continuous rubber paving system made of an aromatic resin, its raw material being a 100% solid MDI-type polyurethane; without volatile monomers and TDI-free. It is specifically designed to agglomerate rubber granules of different granulometries for the manufacture of sports paving and systems for children's playgrounds.

Decosol is a cement paint system for the rehabilitation and painting of sports courts. The cement paint for sports courts is formulated with acrylic resins and high-resistance pigments, specifically designed to withstand constant traffic and adverse weather conditions.

## PAVITHERM

SATE system

The PaviTherm SATE system provides external thermal insulation using 6 cm graphite insulation boards, coated with different finishing solutions (acrylic mortar, cement mortars, lime mortars, etc.)

The installation includes a high-performance adhesive mortar (Revislant) to fix the boards on a previously prepared support. Dowels are placed to ensure the fixation and it is reinforced with a fiberglass mesh, overlapped at the joints for better stability.

As a decorative final finish, one of the most commonly used materials is Mortercil with a fine texture, guaranteeing insulation, durability and a high-quality aesthetic appearance.

## PAVISTONE

Moldable thixotropic mortar

Pavistone is a decorative coating that captures the natural beauty of stone with the durability and strength of modern materials. This system, developed by Pavistamp, offers a continuous finish that faithfully reproduces the texture and appearance of natural stone, ideal for both indoor and outdoor applications.

Thanks to its advanced formula, Pavistone combines high-quality cements, resins and aggregates, guaranteeing resistance to abrasion, inclement weather and wear in high-traffic areas.

It is a versatile solution that brings a touch of distinction and sophistication to any space.

## AREAS

## REVISTAMP

High performance single layer mortar

Revistamp RF is a high-performance single-layer coating ideal for facades, providing a decorative finish and protection against the elements.

Its composition includes white cement, selected aggregates and mineral pigments, which guarantees waterproofing, breathability and ease of application.

This system is suitable for both new construction and renovations and is compatible with spraying machinery, facilitating a quick and efficient installation.

EXTERIOR COATINGSS

# LIME MORTARS

## REVEX CAL

Ecological mortar

REVEX CAL is a family of 100% lime mortars, which are ecological, innovative and made with limes that meet demanding quality standards. They can be used for both rehabilitation and recovery works on old buildings due to their ability to strengthen over time, as well as sustainable constructions, eco-constructions and new constructions.

They are resistant, withstand any type of climate and are used to consolidate bricks or stones. The naturalness and composition of these products means that the breathability process of mortars or paints is never slowed down. They are porous, permeable to drying and breathing of buildings and allow steam and humidity to escape to the outside.

# ECOLOGICAL AND ACRYLIC PAINT

## CROMA GREEN

Ecological paint

Mineral Lime-Based Ecological Paint. Designed to transform your spaces with natural and sustainable beauty. Its flexibility makes it ideal for renovating walls, ceilings, and facades, providing long-lasting protection and an attractive finish.

## REVEX CAL

Eco-friendly lime paint

Paint suitable for painting all types of walls where quality mineral matte finishes are desired, with respect for the environment and generating highly comfortable environments (odorless, breathable, humidity regulating, antistatic and disinfectant).

## INTEX PRO

Plastic paint

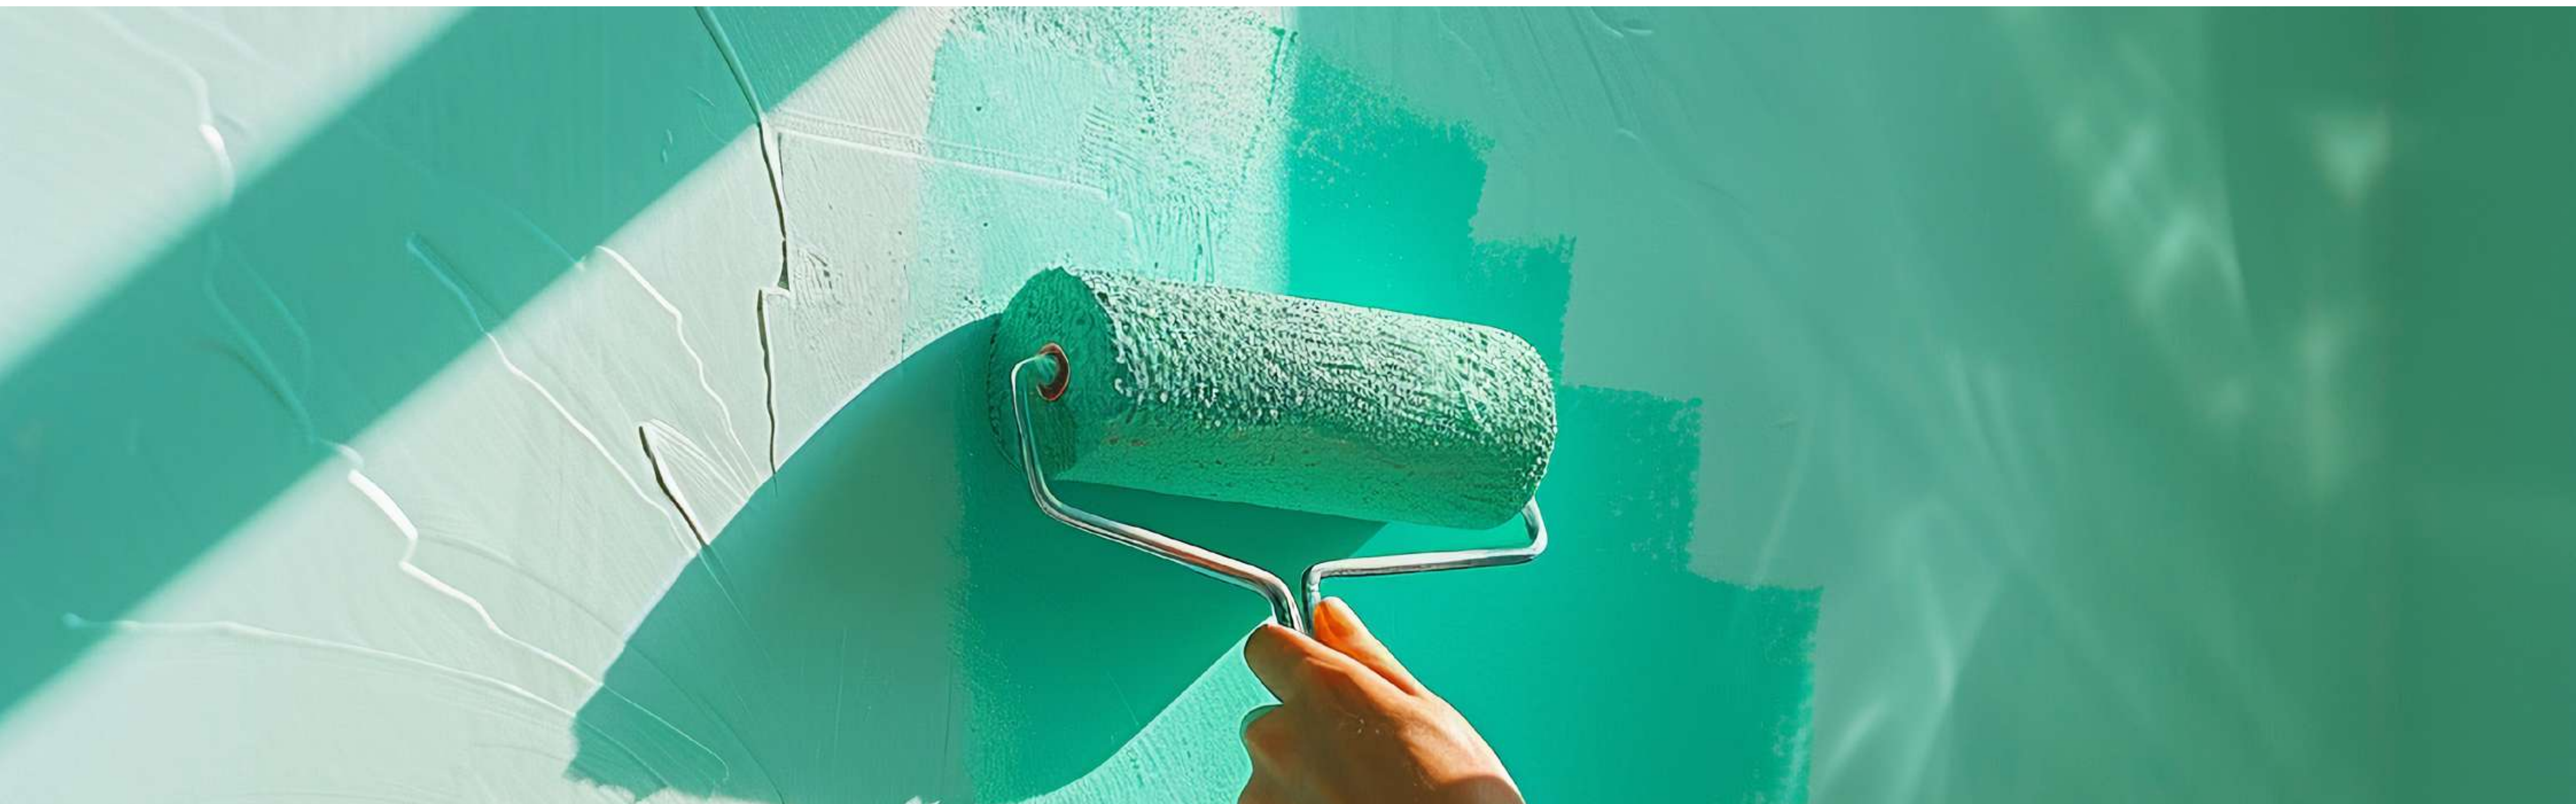

Matt plastic paint for interior and exterior use based on special acrylic resins in an aqueous medium and high-strength pigments.

## HIDROGUARD

Waterproofing

Waterproof and elastic coating. It is a compound based on acrylic copolymers, completely waterproof, highly elastic and with good breathability, ideal for any waterproofing on terraces, finishes and roofs.

## OUTDOOR POOLS

## MICROPOOL

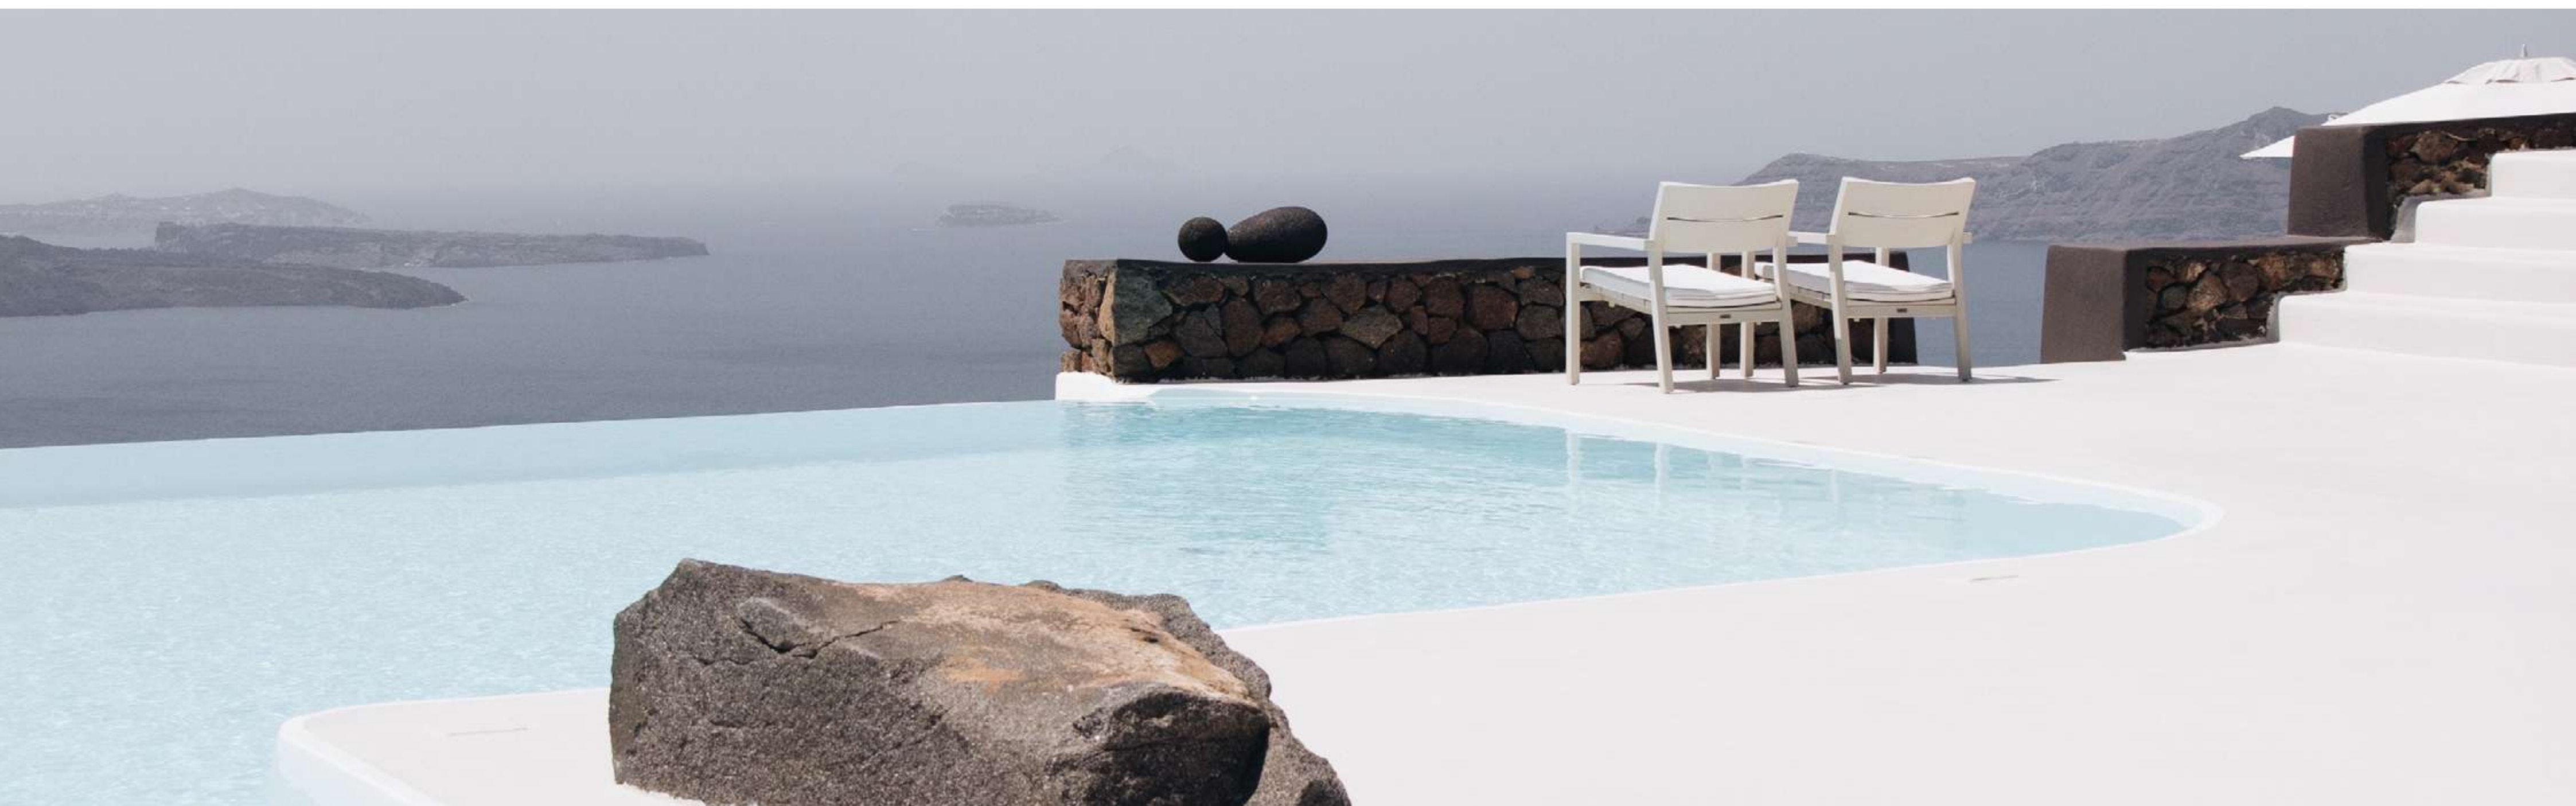

## MICROPOOL

Water based mortar

Micropool is a decorative mortar ideal for coating surfaces in water areas, such as swimming pools. Its continuous application avoids joints, creating a smooth cement aesthetic with a "spatula" effect.

This system offers high resistance to UV rays, abrasion and atmospheric conditions, making it a durable and functional option.

Available in a wide range of colours and is suitable for surfaces over mosaic tiles, concrete and more. Perfect for creating resistant and aesthetically pleasing finishes.

## STONE FEEL POOL

## STONE FEEL POOL

Renovation of all types of surfaces

Stone Feel Pool cement pools offer a durable and fully adaptable option, ideal for those looking to customize their pool in size, shape and finish. Thanks to their versatility, it is possible to choose between thick, thin or aggregate finishes (quartz or crystals), achieving a modern and natural style.

These pools include a waterproof base to prevent leaks and, due to their structure, help maintain a stable water temperature. With proper maintenance, a cement pool guarantees decades of durability.

# HIDROCRIL RENOVATION

## HIDROCRIL

High-resistance pool renovation

Hidrocil is an advanced coating, formulated with a high tenacity and adhesion elastomeric resin, ideal for the renovation and sealing of swimming pools and water systems such as canals, pipes, dams, reservoirs and cisterns. Its innovative formula ensures total watertightness, even when the support has cracks or new fissures of up to 4-6 mm due to overloads.

Once dry, Hidrocil resists constant immersion in water and withstands cycles of solar exposure without deteriorating, and is also compatible with common mechanical cleaning methods in aquatic installations. This system stands out for its resistance to prolonged exposure to ozone and UV rays, maintaining its elasticity and adherence in extreme climates, both in alpine and tropical conditions.

## OUTDOOR SWIMMING POOLS

## PLACING GRESITE OR CERAMIC

## CEMCOL

Pool adhesive mortar

The Cemcol range of products has been designed for laying tiles on interior floors and walls. Its formulation includes cement, silica aggregates and limestone aggregates, with specific additives that improve its workability and prevent sagging.

It offers good adhesion under normal conditions, although the open time can be reduced by wind. It is important not to use it outdoors and to use other products on plaster supports. It stands out for its rectification time of 30 minutes and a paste life of 3 hours.

**HIGH STRENGTH CONTINUOUS DECORATIVE MORTARS****DECOPOX**

Water-based decorative epoxy mortar (A+B)

Decopox is a decorative and extremely resistant continuous coating, only 1.5 mm thick, applicable indoors and outdoors on multiple surfaces (ceramic, marble, concrete, etc.).

This two-component mortar offers a seamless finish, high wear resistance and customizable color options (RAL, NCS, Pantone). Its surface is non-slip (class C1, C2, C3) and vapor permeable, making it ideal for applications in homes, offices and furniture.

It is easy to apply and walk on, making it easy to use in decorative and functional projects.

## INTERIOR FLOORING

## HIGH STRENGTH CONTINUOUS DECORATIVE MORTARS

### REDEXY

Mortar for interior floor coverings

Decorative mortar that achieves the strength of an industrial mortar. It is a three-component water-based mortar for covering interior floors with non-oxidizing aggregates that can give your floor the sensation of a single piece of metal.

It is not recommended to use it as an acrylic mortar on facades or as a mortar to show off exterior walls.

In addition to providing aesthetic results, this self-leveling walkable mortar regulates potholes and cracks in concrete floors and can be applied on surfaces subject to high traffic such as warehouses and commercial premises due to its extreme hardness. It also has great results in chemical and food industries.

## STONE FEEL CONCRETE

Hi-Tech Concrete 100% recycled aggregates

The creation of structures and furniture serves as a palpable testament to the unrivalled versatility of Stone Feel Concrete. Beyond being a simple cladding, this product stands as a masterpiece of adaptability, moulding itself to any imaginable size and shape.

Customisation becomes an essential tool for designers, as they can not only choose from a wide range of colours, but also have the freedom to add distinctive elements according to the specific needs of the project.

The jewel in the crown lies in the ability to have the furniture exactly reflect the finish and texture of the horizontal or vertical cladding. This level of aesthetic coherence elevates the design to new heights, providing a visual continuity that ties the entire space together harmoniously.
