Decopox

Repair and Decoration of Floors and Walls

Do you want to repair and decorate floors and walls with a single system?

Decopox is a decorative mortar with the strength of an industrial-grade material, offering a durable and aesthetic finish.

It is a water-based, two-component mortar that can be applied on both vertical and horizontal surfaces.

Its wide range of colors and adaptability to multiple environments make it ideal as a decorative mortar, customized just for you—at Pavistamp, we produce RAL, NCS, and universal color chart shades.

It is walkable and can be applied to a variety of surfaces

such as ceramic, stone, marble, tiles, concrete, or glazed surfaces. Decopox is extremely hard, making it highly resistant to wear.

It is a clean and easy-to-apply material, requiring no specialized skills. Use it as a decorative mortar with custom textures and finishes for offices, apartments, hotels, commercial spaces, and more.

You can also use it to coat kitchen countertops, shelves, and benches—essentially, to create custom furniture. It is joint-free, non-absorbent, yet permeable to water vapor.

Redexy

Mortar for interior floor coatings

Redexy 3C is a decorative mortar with the look and feel of continuous metal

It is a mortar designed to coat floors and walls. This is a three-component water-based material with non-oxidizing aggregates that can make your surface resemble a seamless piece of continuous metal.

Once applied and dry, it is sanded to reveal all its inner beauty. The ideal area of application is indoors.

In addition to providing outstanding aesthetics, this mortar is walkable. Use it as a decorative mortar with customized finishes for offices, apartments, hotels, commercial premises, and more. It can also be used

as a material to cover kitchen countertops, shelves, and benches.

This decorative coating is seamless and easy to maintain. The Redexy system can be applied on any surface, with prior preparation.

At Pavistamp, you can choose from a wide range of universal colors, as well as RAL and NCS shades, to apply to your mortar flooring. Resistance, durability, and a strong yet flexible texture are among the key properties of this self-leveling decorative mortar.
