## PANTERA

Self-Levelling Micro Concrete

Fluid from 0 to 6 cm

- Compressive Strength:  $> 50 \text{ N/mm}^2$
- Adhesion to Substrate:  $> 1 \text{ N/mm}^2$  Minimal
- Shrinkage (Vertical and Horizontal)

**Pantera is a self-levelling micro concrete** designed for **floor repair, levelling and screeding** in new builds or renovations. Its application is ideal for **underfloor heating systems**, ensuring a durable and uniform surface from **30 mm thickness**.

It can be covered with ceramic, terrazzo, PVC, linoleum, vinyl, carpet, wood flooring or microcement,

offering great versatility in finishes. It can be applied as a floating floor over self-supporting plastic or anti-impact membrane from 3 cm thick, and over rock wool from 40 mm thick.

No apparent shrinkage, both vertical and horizontal.

Pantera is the optimal solution for projects that require a continuous floor with high strength, stability, and compatibility with multiple coverings.
