Benefits of Working with Pavistamp Delegations

**OUR DELEGATIONS
AT YOUR SERVICE**

We are where you need us. Local advice with
manufacturer support.

Trust in our collaborators

One of the keys to Pavistamp's international success has been the constant investment in specialized training. Each delegation has suitable personnel, capable of serving national and international clients with solvency, which is crucial for large-scale projects and collaboration with architects, designers and applicators from different countries. Continuous training in products, techniques and trends allows our teams to be prepared to solve any need with agility and precision.

PAVISTAMP NETWORK OF DELEGATIONS

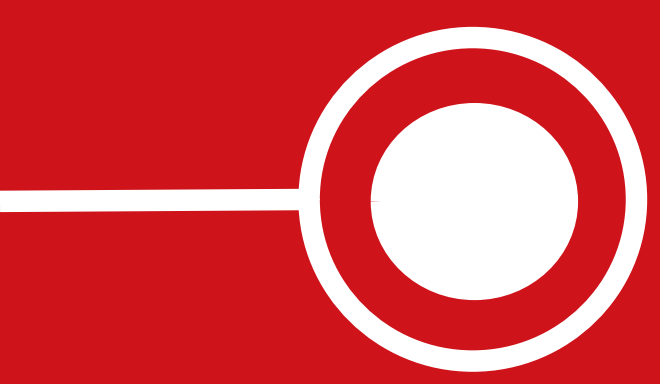

In addition, we work under a homogeneous quality model. Although each region has its own particularities, all our services are governed by the same technical and commercial standards. This ensures that, whether in a delegation in Northern Europe or in the Mediterranean, the client always receives first-class attention and rigorous advice. Our structure allows us to be local in our dealings and global in our knowledge.

At Pavistamp we understand that the market demands complete solutions. For this reason, each branch not only sells products, but also advises, prescribes, offers training and provides tests. This generates a solid relationship of trust with customers, who know that they can count on a close, accessible and professional technical team. From public works to exclusive residential projects, our professionals add value in all phases.

This mixed approach of proximity and international projection is what allows us to grow coherently and maintain ourselves as a benchmark in the sector. Pavistamp is committed to people, to experience in the field and to a close attention that translates into real results. Because only a well-prepared and connected team can deliver global quality from every corner where we operate.

A Manufacturer involved in every great detail.

OUR ADVANTAGE
GLOBAL

1. Initial advice: Needs analysis and technical support.

2. Preparation of supports: Customized solutions in each project.

3. Technical Support and Documentation: At your disposal you will have the necessary means to know the application of our products and their preparation, action and completion phases under our supervision.

4. Execution: Supervision with approved applicators and commissioning.

5. Finishes and commissioning: Guarantee of results.

Local Experts, Global Quality.

It is not just a motto, it is the basis of Pavistamp's work philosophy. Our **network of branches** not only represents points of sale, but also true centers of technical knowledge and personalized attention.

Each branch has **technical staff** and **trained** in Pavistamp products.

DELEGATIONS WITH PAVISTAMP'S SEAL

We ensure that each team at each location is made up of **experts who know the local market in depth**, but also have a broad and global vision of the construction, cladding and decorative systems sector.

Speed, Experience and Commitment in Each Project

- **360° Service:** We are involved from the design to the implementation of each of the projects.
- **Network of Approved Applicators:** Guaranteed quality in all executions and with trained personnel.
- **Technical and Commercial Support:** Personnel trained to solve specific needs.
- **Site Visits:** Face-to-face accompaniment in critical phases.
- **Global Catalogue:** Solutions adapted to each market (climates, regulations, designs, certifications, special or even internal transport).
- **Tools for your decision-making:** Library of videos and images of projects, works, preparation of supports that are available, as well as samples of decorative finishes to improve your meetings with clients and decision-making.
- **Sample preparation:** Pavistamp has a laboratory and a technical workshop for the manufacture of our samples, according to your expectations and wishes, but you can also choose to have our delegations prepare these samples on-site or at their facilities.
